Service Modules

Customer Satisfaction is a Top Priority

The objective of Dr. Schenk is complete customer satisfaction. We accomplish this through innovative and practical solutions, responsive technical support, training and consulting throughout the entire project. Take advantage of Dr. Schenk's in-depth knowledge and technical experience by choosing any combination of our available service modules to find your optimal service solution.

Dr. Schenk is focussed on innovation and meets the industries' needs. High-level support and maintenance agreements complete the seamless integration of our inspection solution into the customer's production and operation.

How to use the Service Modules

The service modules are built so that they complement each other and work seamlessly together. You may choose any combination of modules to tailor the best service plan for your business. For example, you could schedule a once a year maintenance visit together with business hours telephone and email support. If you work in a fast-changing production environment you may need full time, around-the-clock technical support. The 24/7 support upgrade can be booked in addition to other components. Our IPRS Package is ideal if you would like seasoned experts at your side to ensure successful introduction of your inspection system.

Speak to the Dr. Schenk service team to find out what is exactly right for you.
